

## Psychology Summer Bridging Work

You have 2 tasks to complete this summer:

1. Complete the questions on the worksheet below.
2. Define the following Approaches in Psychology - Biological, Cognitive, Learning and Social. Then find a separate newspaper article for each approach and write a paragraph to explain how the newspaper article is relevant to each Approach e.g. you might find a newspaper article on gang crimes and link it to Social Psychology and explain that in-groups and out-groups and the concept of conformity are both relevant to gang crimes.

## Summer homework task for Psychology

You must go to the British Psychological Society and read the 'Code of Human Research Ethics'

<https://www.bps.org.uk/news-and-policy/practice-guidelines>

Your answers should be detailed and show that you have a good understanding of what the guidelines actually mean. You will be tested on your understanding of them in September.

**Year 12 Name** \_\_\_\_\_

1. What does confidentiality mean in the context of psychological research? (2)

---

---

---

---

---

---

---

---

2. What should a psychologist do if a participant ask for advice about an issue of which the psychologist is not an expert? (2)

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

6. Explain what is meant by the 'right to withdraw'? **AND** What must a psychologist do if the participant chooses to withdraw? (2+2)

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

7. What risks to participants should a psychologist consider when designing a research study? (3)

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

8. Who can give consent? (2)

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

9. What is the term used in psychology to say that participants should not be given rewards to induce them to take part in behaviour that they would not normally do? (1)

---

---
