

Tech Project

29th June - 3rd July

Izzy Waring

Finger Knitting

I Found the finger knitting very fun. I found it fun because it wasn't too complicated and it wasn't long until I got the hang of it and started to see it come together.

I would be interested to see what it would look like with different thicknesses and colours of wool as I used thin wool and I think it would look more full and rope like with thicker wool.

Chanel Flap Bag

I researched the Chanel Flap Bag as it is a classic, original bag and I wanted to find out more about it.

This bag is special because it was the first high end bags with a strap so you could have your hands free. The convenience of having a strap was soon realised so bags with straps came into fashion.

Met Gala Outfit Design

This is my design for a dress for the Metropolitan Gala. My design is an OPI nail polish in a berry colour and i think it is very unique and special.

I think this outfit is perfect for the occasion because it is one of a kind and very unique.

The dress is the nail polish bottle and the choker is the screw, which the lid is secured with and the head piece is the lid with drips of nail polish over the face.

Letter Room Decor

This is my letter room decoration; I did the letter 'I' because it is the letter at the start of my name - Izzy.

I painted my cardboard letter a white/blue colour and then added gold to the corners. Then, I decided to add silver and blue gems on to the edges to make it stand out more.

Upcycled sock

I turned an old sock into a sock puppet using googly eyes and a bit of felt as a tongue. It has a better use now because it wasn't being worn and now when small children come over (when lockdown is over) they have another toy to play with.
