

Technology Bingo Challenge

Design Tech

Day 1-

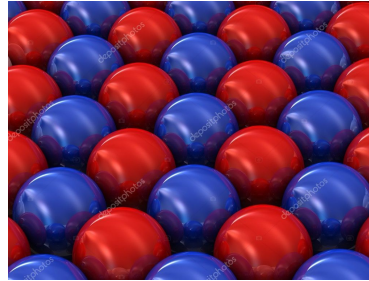

I chose to do this as my album cover. This is because the image in the middle is a basic, trending clothing style at the moment and I would consider myself as a somewhat basic person.. This is because I don't tend to stand out in crowds and I dress similarly to others and I don't have my own specific style to associate with myself. I titled the album 'imagine' because I feel like I need to stop following the crowd and think about who I want to be. And to do so I need to imagine different scenarios and styles to associate myself with.

Day 2-

In my ball game, you have to have two teams and at least two people on each team. There will be a red team and a blue team. Each team has a side they have to start on. They will each have a bucket (called a base in the game) of their colour and it will be on the other side of the pitch/area. In the middle of the two teams, are lots of balls(around the size of a ball-pit ball) and there are two colours (red and blue) The red team has to pick up their red balls and put them in their red bucket on the other side of the pitch. You can only pick up two balls at a time. The same goes for the blue team but with their blue balls and bucket. The team with the most balls in their bucket at the end of the round (1 or 2 minutes) wins! However you can prevent the opposing team from winning! You can go over to the opposing teams bucket and take out (only two at a time) and throw them back into the middle causing them to loose balls and therefore possibly lose the game. You can't though hang around the opposite team's bucket all the time as this is unfair. You could put some balls into your bucket and then run over to the opposing teams bucket then.

Day 3-

8 Using the centre of a toilet/kitchen roll; upstyle it into a new 'useful' item

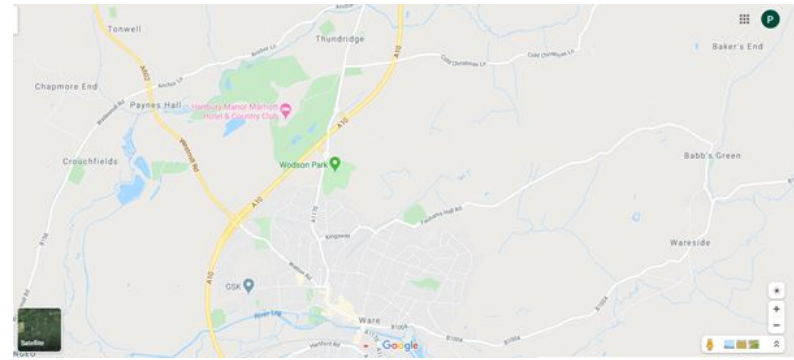

I made a flower pot out of a centre of a toilet roll because this is useful if you can't find or don't have any flower pots to put seeds in. I cut down a toilet roll centre and , using pva glue, i stuck the bottom of the toilet roll to a piece of spare cardboard i cut into a larger circle to make a base for the pot. I added some cotton at the bottom of the 'pot' to separate the dried glue from the soil. I decorated the outside of the pot to make it look nicer. Then i added in the soil and i need to put in some seeds when i get them but hopefully my 'useful' item will be helpful and the seeds will grow.

Day 4-

11 Create a map of your local area, in the style of Harry Beck (use Google Earth to help you)

Inspo:

key:

- wadesmill rd
- chapmore End
- Ware rd
- westmill rd
- Watton rd
- Anchor Ln
- A10
- cold Christmas Ln
- Poles Ln
- Harbury Dr
- Kingsway
- High Oak Rd
- Farhams Hall Rd

Day 5-

14 Draw an electronic item that is in your house (try drawing in black biro)

I chose my family shared apple imac to draw as it is a simple drawing yet it stands out in our house as modern and new which makes me like it
